(54) MRI EQUIPMENT

(57)Abstract:

PROBLEM TO BE SOLVED: To reduce the stress and anxiety of a subject in MRI examination and to improve operability in disposing the subject in an examination space.

SOLUTION: In the MRI equipment provided with a static magnetic field generation means for generating a uniform static magnetic field in an examination space in which the subject is to be placed and a carrying means for carrying the subject in/out from the examination space, the level of the floor where the static magnetic field generation means is installed is made different from that where the carrying means is installed. Since the height of the examination space can be kept to be at a low level, sence of security is given to the subject while the subject is carried and operability is improved.

LEGAL STATUS

[Date of request for examination]

04.07.2005

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or

application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's
decision of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
